

The intuitive knowledge management solution

KnowledgeIQ 
A solution by Knosys

KnowledgeIQ, by Knosys, is a market leading cloud-based (or on-premise) omni-channel knowledge management solution that simplifies and centralises the organising and sharing of knowledge and information.

KnowledgeIQ is trusted by over 40,000 users to find the right information, exactly when they need it, improving productivity and delivering the best in brand and customer experience.

Enhance customer experience

Deliver consistent, accurate and relevant knowledge to customers across engagement channels.

Encourage collaboration

Empower staff to assist in keeping knowledge current with in-article ratings, comments and forums to capture knowledge.

Improve productivity

Streamline processes, training and development by centralising information for easy access and instant answers.

Improve governance and compliance

Protect your brand by customising approval and publishing processes, moderate forums and audit for compliance purposes.

Improve staff engagement and retention

Improve job satisfaction and morale by enabling staff to find the information they need to perform their role ensuring more ownership, autonomy and confidence in their abilities.

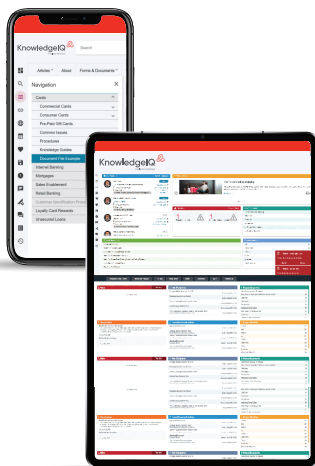

Fast on-boarding of staff and customers

Reduce training time for staff, and explanation time for customers, by providing guidance and visual workflows on how to approach and complete tasks.

Minimise errors and manage risk

Reduce your legal exposure and risk with business procedures, process mapping and guidance that minimises errors, reduces costs and restricts duplication.

"It was impossible to find what you were looking for on our old knowledge management platform. Now we can easily find answers to our questions using search or the menu structure.

I am confident that if the answer is on the new platform, our solicitors can find it."

Erik Dober, Senior Solicitor
Office of Public Prosecutions, Victoria
